1927 GOLDEN RULE DAHLIAS

HARLEY T. PECK LEBANON, OHIO

, , , , , **1**

JOIN THE AMERICAN DAHLIA SOCIETY

This society is invaluable as a guide and inspiration to its members, among which we are proud to number. The Quarterly Bulletins are chock-full of information and enthusiasm about the Dahlia. Join now, the dues are \$2.00 a year. The secretary is Mr. William J. Rathgeber, 198 Norton St., New Haven, Conn. To belong to the American Dahlia Society is not only a distinct pleasure to one who loves Dahlias but also an excellent investment.

1927 GOLDEN RULE DAHLIAS

١٧٤٤

C-300

C. 701

E LOVE the Dahlia for its wonderful production of flowers and its superb beauty expressed in many varied forms and colors.

E THANK YOU, ladies and gentlemen, for your enthusiasm, your patronage, and your good letters of praise for the quality of our Dahlia tubers.

HARLEY T. PECK .. Lebanon, Ohio

1932

N this catalogue you will find the most valuable Information yet given to the public concerning Dahlias. Choose the varieties that rate highest in the last column of our table of ratings on page 5, follow our cultural directions and the most wonderful flower in the world, the Dahlia, will give you freely of its best.

Anybody, no matter what their tastes are, may by these ratings select the varieties which will suit them best. Some desire extraordinary beauty and do not care particularly for profusion. These may select those rating highest for beauty. Those desiring a great profusion of flowers should select the dahlias rating highest for "Floriferousness" and "Resistance to heat and thrip." Someone may wonder why he did not winter the roots of certain varieties last season. A glance down the column headed "Root Keeping" will probably give the answer. The florist who grows dahlias should choose the ones rating highest for "Substance," "Position of Flower" and for "Floriferousness," and so on, whatever one may desire, the information is at hand, so that one's wants may be fulfilled.

This catalogue also contains on page 11 a brief description of the colors of each variety, size of flower and tuber price. On page 15 you will find brief cultural directions.

In 1925 we published the first rated Dahlia catalogue. This was only a starting point.

Our new table of ratings herein needs no explanation, for it presents for the first time in the world, full, complete and accurate information as to the best varieties of dahlias to grow to get results as measured by production of flowers, and all other qualities. We hope all readers will be guided by it in their selection of varieties. On many varieties, rated but not included in our color and price list beginning on page 11, we can quote on request.

GUARANTEE

We guarantee all stock to be as represented, to grow if planted properly and to give satisfaction to the purchaser. If anything should be wrong we want to know about it and make it right the same season.

TERMS

Delivery of tubers will be by post or express between May 1st and 20th unless otherwise instructed. The terms are cash with order.

TO PREPARE FOR EXHIBITIONS WHEN LARGE FLOWERS ARE DESIRED

Plant June 10th to 15th for early September exhibitions; June 20th to July 1st for late exhibitions. Count three weeks from the time a bud becomes visible to the time when the flower can be cut, and start disbudding accordingly. The first buds may be too early for exhibitions; if so, do not allow these to bloom. Keep your plants as low as possible by disbudding severely from the tips at least two joints down.

RATINGS

In the following tabulation of ratings, thirteen (13) large-flowered dahlias rate above 91 points. These are:

A. D. Livoni, Show92	*Landscape Peach, Dec93
*Drifting Cloud, Dec., '2794	Mrs. I. de Vere Warner, Dec92
Gladys Bates, Cactus92	*Ohio Glory, H. C., '2792
*Golden Acre, H. C., '2894	Papillon, H. C92
Jersey's Sovereign, Dec 93	*Royal Beauty, Dec., '2792
Judge Marean, Dec92	Sagamore, Dec94
Jersev's Beauty, Dec93	

Eighteen (18) others rate 91 points. These are:

. ,	*
*Aureo, H. C., '27	Halo, Dec.
Black Prince, Show	Jersey's Radiant, H. C.
Bertha Horne, H. C.	Jean Kerr, Show
Black Top, Dec.	Leora Creed, Dec.
Champagne, Dec.	*Luxuria, Dec. '28
Daddy Butler, H. C.	Philipino, H. Show
Esther R. Holmes, Cactus	Red Wing, Dec.
Francis Lobdell, H. C.	Susan G. Tevis, Dec.
*Heart of Gold, Dec. '26	Warren S. Seipp, Cactus

We guarantee the above thirty-one varieties to give the utmost of satisfaction to the purchaser from the viewpoint of the production of satisfactory flowers throughout the summer and fall blooming season. Those having an average rating of 88-90 will also be found to give great satisfaction.

NOTE: In rating for "Beauty" and "Floriferousness" we have compared each variety only with those of the same type and color. The ratings preceded by "N" are taken from Prof. J. B. S. Norton's 1925 edition of dahlia ratings. This is done whenever these were available. "*" Denotes a variety originated at Golden Rule Farm. '26, '27, etc., denotes year of introduction. Color descriptions and price list are on pages 11 to 14.

Wherever the average rating is not given in the above tabulation, the data on hand is insufficient, the varieties not having been grown long enough to complete our information. This rating is based on the performance of these varieties in our fields, and in our climate. However, we state with confidence that the varieties we have rated the highest will, over a period of years, give the best results by far in other soils and climates than our own.

Many Dahlias having an average rating between 80 and 90 points will give good results during most seasons in a garden partly shaded or sheltered from the sun and wind or in a cooler climate than we have in southern Ohio.

With very few exceptions we discard all Dahlia varieties rating below 80 points average.

NEW GOLDEN RULE INTRODUCTIONS FOR 1927

"R" stands for Ridgeway (color chart).

- *Aureo (Peck)—Hybrid cactus—Wax yellow, shaded pompeian red, reverse pompeian red—R. A warm soft bronzy shade in an immense flower, 6 to 8 in. It starts to flower in mid-season, is continuous and is 100% proof against thrip and heat. The foliage is of unusual brilliance and quality under all conditions.

 Tubers, \$5.00
- **Cupro (Peck)—Decorative. A clear apricot orange—R. or the color of the bright unoxidized metal, copper. Of a habit of growth almost identical to the old dahlia, Patrick O'Mara, but much more resistant to hot weather conditions, with a larger flower and an entirely different color. Flowers are 4 to 6 inches and stems good. Scored 88 cutting, 84 exhibition and 87 garden at Southern Trial Grounds, College Park, Md., 1926.

 Tubers, \$3.50
- *Landscape Peach (Peck)—Decorative. A low bush covered with fine blooms all facing up on good stems. Ideal for landscape decoration and unsurpassed for cutting. An autumn tint combination—strontian yellow very heavily shaded jasper red—reverse of petals jasper red—R. The latter color deepens in the centre of the bloom, making a very attractive flower. Size 3 to 5 inches.

 Tubers, \$5.00
- *Ohio Glory (Peck)—Hybrid cactus. A chrysanthemum type dahlia. It scored 87 points for cutting and 87 as an exhibition flower at College Park Trial Grounds, 1926. There is such a heavy and close veining of tyrian rose varying to rhodamine purple on a mallow pink ground-R., that this dahlia presents a deep glowing rose pink self-color. The most shining color in our fields. The plants have an ideal habit of growth, always have resisted thrip, disease and heat 100% and some of the finest flowers are produced in the hottest weather. Flowers consist of numerous petals waved and curled of a form superior to anything we have seen. Flowers 5 to 7 inches. Stems 8 to 10 inches. Early and continuous flowering throughout the season. More beautiful and large flowers are produced for us by this dahlia than by any other variety. (A broad statement, but true.) Ohio Glory, in respect to beauty, number of blooms, resistance to heat and disease and habit of growth is way ahead of the best pink dahlia we have heretofore seen or handled. Is a good root maker and the tubers winter well. Tubers, \$10.00 each.
- *Royal Beauty (Peck)—The decorative beauty of this flower is superb. In color it seems to be close to royal purple. According to Ridgeway it is Pomegranate purple, shading to true purple at tips and to bordeaux at center. Reverse is aster purple. The very large and deep

blooms seem to have a halo of bluish purple around the edges. Field grown flowers for us will be from six to nine inches across and three to five inches deep. One of our best keepers when cut (has kept good for two weeks) and is therefore of the very best for exhibition. Stems are long and hold the flower facing right angles. This is without doubt the most massive flower and has the best keeping qualities of any dahlia we have ever grown.

Tubers, \$20.00

*Drifting Cloud (Peck)—Decorative. The excellent keeping qualities when cut, the long stiff stems and the uniformly correct position in which the flower is always held make this dahlia a cut-flower of the highest merit. Color is white shaded ivory on which pink is lightly tinted and overlaid. Size of flower, 3 to 4 inches. The foliage remains untouched by thrip and the plants bloom with extreme profusion throughout the season.

Tubers, \$5.00 each

DEFINITION OF DAHLIA TYPES

- Cactus Dahlias—Have fully double flowers with revolute (rolled outward from center) petals, pointed, either straight or incurved toward center. Good Cactus Dahlias are rare and very beautiful.
- Hybrid Cactus—Are in form midway between cactus and decorative, partaking of both forms. They have pointed petals or partly rolled and are of rare beauty. Next to the Decorative this is the most popular type.
- Decorative Dahlias—Are fully double with petals large, broad, flat or slightly rolled at edges. As flower develops the petals often turn backward, giving the flower depth. The newer decoratives have a wonderfully varied arrangement and form of petals. This is at present one of the most popular types.
- Show or Ball Dahlias—Are the old-fashioned ball or flat ball form with quilled involute petals. The Hybrid Show type partakes of the decorative form and is more popular for exhibitions because of its larger flowers.
- Pompon Dahlias—Are small compact Show Dahlias not more than two inches in diameter. They are fine for bouquet or basket work.
- Peony Dahlias—Are noted for their large blooms, good stems and artistic arrangement of petals. They have two or more rows of petals around a more or less covered center and are sometimes, especially early in the season, fully double.

NOTE—The price quoted after each description is the single tuber price unless otherwise specified. For further information than contained in the following price list, see table of ratings on page 5.

DECORATIVE DAHLIAS

standards.
Amun Ra (Seal)—Cooper to reddish bronze. A very beautiful color and the flower is large, five to ten inches, but it nearly always shows a hard green centre or our farm
Black Top (Superior)—Violet earmine, shaded earmine—R. The best all-round dark red. Three to six inches
Black Jack (Dressler)—Blackish maroon. Six to 10 inches. Very tall. Rather late
Champagne (Boston)—Color of golden chamois. Large and massive. Six to eigh inches
Canteen (Vincent)—Salmon pink. Profuse all season and good for cutting. Two and one-half to four inches
Constancy-Clear pin. Four to five inches. Excellent. Tall\$2.00
Dr. H. L. Tevis (Pelicano)—Gold shaded old rose. An old favorite. Five to ter inches
Dakota (Marean)-Flame color. Four to five inchesTwo for \$1.00. Each 600
Darlene (Alexander)—Most profuse of all. Shell pink. Two and one-half to five inches
Empress Eugenia (Vavra)—Pink cut-flower facing up on stem. Three to six inches
Earl Williams (Doolittle)-Large, fancy, scarlet and white. Five to seven inches.\$1.50
Elm Camino Real (Vavra)—Large, deep red, facing up on stem. Six to 8 inches
Eleanor Martin (Pelicano)—A good new variety. Mulberry shaded gold. Six to seven inches
Faith Garibaldi (Boston)—Another good new light rose pink. Six to eight inches.\$5.00
Grenadier (Boston)—Bordeaux lightly shaded earmine—R. Reverse, shaded silver Very large. Long stems. Fine
Giant Ruby (Greinberg)—Bright glowing ruby. Five to seven inches\$3.00
*Heart of Gold (Peck)—Flesh ochre nearly to centre which is strontian yellow. R They tell us in Massachusetts that this flower is pink to its centre and very beautiful. All the blooms we have seen have the clear gold heart—hence its name. Of hybrid decorative form. Good stems 5 to 20 in., holding flower well Keeps longer for us than any other variety when cut. Profuse throughout the season. It never has shown an open centre. We never grew a flower larger than 6½ in. and most are from 4 to 6 in., but many of our friends in Ohio have obtained plenty of 7 and 8 and even 9-in. flowers, without disbudding Tubers
Nashville, Tenn., and Eastern Division Tennessee State Fair at Knoxville, Tenn., we will award one tuber of the remarkable bright pink hybrid cactus "Ohio Clory".

Harry Sheldon, Jr. (Murphy)—Delicate pink to white centre. 6 to 10 inches....\$5.00

Halo (Kunzman)—White shaded lemon from midway to base of petal. Very beautiful. Extremely profuse and good stems make this a fine cut flower. Size

Judge Marean (Marean)—Rose red shaded to martius yellow at base. Early in season almost pure rose red—R. The most profuse of large flowered dahlias. 4 to 7 inches. Stems good
John Alden (Boston)—Crimson shaded royal purple. Large\$1.00
Jersey's Beauty (Waite)—Eosine pink shaded gold. 3½ to 6 inches. Stems 5 to 10 inches. A very fine dahlia
Jersey's Sovereign (Waite)—Scarlet red to scarlet self-color—R. 5 to 6 inches. One of the very best dahlias\$2.50
Jersey's Jewell (Waite)-Very large shell pink. Excellent stems, 8 to 15 inches. \$2.50
Kitty Dunlap (Boston)—Rose color. R. Decsribed as American beauty red. Very lasting when cut. 3 to 5 inches. Fine long stems
Lucy Davis (Davis)-Orange shaded apricot. 5 to 7 inches. Midseason\$1.00
La Crescenta (Bromall)—Clear Canary. Very large. 6 to 8 inches\$3.50
Maid of the Mist (Slocombe)—Deep cream shading to cinnamon pink. 6 to 8 inches
Mina Burgle (Burgle)—A fine profuse bright red. $3\frac{1}{2}$ to 6 inches60c
Mephistopheles (Marean)—Deep crimson, with tiny tips of yellow. 5 to 6 inches. Very fine stems\$1.50
Mrs. I. de Vere Warner (Marean)—Light rosalane purple—R. Described as mauve 5 to 7 inches. A famous dahlia
Mrs. T. B. Ackerson—Fancy. Pink, white and yellow. Profuse
Mrs. J. T. Sheepers (Marean)—Pink with yellow centre. 5 to 7 in. Good\$1.50
Mrs. Carl Salbach (Salbach)—Light lavender pink. 5 to 7 inches. Late flowering, but very good indeed. The longest and best of stems50c
Mr. H. C. Dresselhuis (Holland)—Bright pink. 2½ to 4 inches. Cutting\$1.00
Mr. Alex Waldi (Broomall)—Cream and pink. Exceedingly beautiful. 5 to 7 inches. Two for \$1.70. Each 90c
Mr. Crowley (Broomall)—Pink and gold. Brightest of colors. 3 to 5 inches\$1.00
Patrick O'Mara (Vincent)—A standard cut flower of orange shaded pink. 2½ to 5 inches
Pride of California (Lohrmann)—Deep crimson. 4 to 6 inches
Pride of Connecticut (Alling)—Deep rose pink—R. 4 to 5 inches. Very free flowering
Rookwood (Boston)—A pink of high merit. Color is between tyrian pink and light rosalane purple—R. 4 to 6 inches
Red Wing (Kirby)—The best red we have. Bright deep nopal red, almost a carmine—R. 3½ to 5 inches
Sagamore (Kirby)—Primuline yellow deepening and approaching zinc orange in centre—R. One of the finest. 4 to 7 inches. Fine stems
Snowdrift (Broomall)—Pure glistening white. 5 to 8 inches
Sunbeam (Slocombe)—Scarlet tinted gold. 4 to 6 inches\$1.00
Shudow's Lavender (Boston)—Lavender shading to white. $3\frac{1}{2}$ to 5 inches\$2.00
Susan G. Tevis (Boston)—Deep lavender. According to R. it is light mallow purple closely streaked with true purple. 4 to 6 inches. Profuse and excellent in every way

Klein Domitea—The best orange pom.50cLittle May—Bright lemon yellow.50c
Little Jewell—A new bright pink miniature decorative \$2.00
Nerissa—Lavender pink. Very fine
Snowclad—The best white. Faint blush of pink
Sunbeam—Bright crimson. Excellent

BRIEF CULTURAL DIRECTIONS

Best Planting Time for Dahlias in Ohio, May 1st to June 15th.

I am convinced that the two most important rules for successfully growing dahlias are: (1) Have the soil well drained. (2) Do not overfertilize. The use of manure from barnyard or hencoop may give good results one season and result the following season in little or no flowers and loss of tubers. The people who not only grow good flowers from dahlia tubers but also keep their roots over winter are those who do not over-fertilize.

Other points to be observed are: Humus in the soil. Rye sown in late fall and plowed under in spring is an excellent source of humus. Fertilize with bone-meal, wood and coal ashes and a good standard grade of commercial fertilizer suitable for potato culture. Water only when urgently needed and then soak to a good depth. Mulch with straw or other litter between plants after August 1st to conserve soil moisture.

To properly fertilize dahlias, start when plants are ready to bloom and scatter wood ashes moderately between the rows, mixed equally with a good grade of commercial fertilizer and some bone-meal. Sulphate or Chloride of Potash may take the place of wood ashes as a source of Potash, which is the most important fertilizer by far for dahlias. However, do not use Chloride of Potash in two successive seasons for Chlorides in excess may poison the soil. Put all your winter's coal ashes, coarse and fine, together, into your garden, scattering to a depth of two to three inches, and in the spring mix thoroughly with the soil by spading at least twice.

Plant the tuber horizontally when the ground is ready, not less than three and one-half feet apart, three inches deep in heavy soil and four to five inches in light soil. A stake should be driven in before planting. Cover the tubers level with the ground, firming well. The plant should appear within a month, if not, let us know. Cultivate early and often until the plants show buds, then start fertilizing and disbudding. Cut flowers freely to promote further growth. Never sucker a dahlia plant from the base, but disbud from the tip down, two or three joints or nodes only, leaving the best bud at the tip of each branch. There will be plenty of other branches for later flowers.

GOLDEN RULE DAHLIA FARM

HARLEY T. PECK

LEBANON,

OHIO

Please use this page, if you wish, as your copy of your order, writing the names and prices of the dahlias you select so that you will always have at hand a list of just what you have ordered.
